Professional Summary

Skilled Senior Site Reliability Engineer (SRE) with 3 years of experience in systems engineering, cloud-native technologies, and full-stack development. Proven expertise in building and managing scalable, reliable systems using **Docker, Kubernetes, and AWS**. Full-stack proficiency with **React.js, Node.js, MongoDB, and Python**, enabling seamless collaboration across development and operations. Adept at automating infrastructure, supporting production systems, handling on-call responsibilities, and driving SRE best practices to improve uptime, performance, and cost-efficiency. Strong communicator and team player focused on delivering resilient, high-quality solutions.

Experience

Tata Consultancy Services

Hyderabad

Engineer

10/2021 - Present

APPLE

- Ensured 24x7 system availability and smooth operation of services using tools like Spinnaker, Splunk, Ansible, Docker, and Kubernetes.
- Designed and implemented automation solutions using Ansible and Python to streamline patching, upgrades, and maintenance tasks, improving efficiency and reducing manual effort.
- Built and maintained Spinnaker pipelines integrated with Ansible scripts for end-to-end infrastructure and application deployment, reducing deployment time by 40%.
- Used Grafana to implement monitoring and alerting for key system metrics (CPU, memory, disk, network, and security), helping maintain 99.9% system uptime.
- Collaborated with production support and engineering teams, leveraging Splunk to analyze logs and drive proactive performance tuning and issue resolution.
- Developed and maintained scalable, interactive front-end applications using React.js, improving UI responsiveness and user experience.
- Built Node.js APIs and integrated them with MongoDB, ensuring reliable data flow and enabling scalable back-end functionality.
- Containerized applications with Docker and deployed them in Kubernetes clusters to ensure high availability, scalability, and consistent environments.
- Managed code repositories using Git, enforced coding standards, resolved merge conflicts, and automated common development workflows.

Education

Vignan's Institute of Information Technology

Visakhapatnam

Bachelor of Technology

08/2017 - 07/2021

Skills

- Data structures/algorithms
- JavaScript
- git
- Splunk
- Spinnaker
- Kubernetes
- Python
- React Js
- ansible
- linux
- Docker

Languages

Telugu

Native Speaker

English

Good Command

Certifications

Google Associate Cloud Engineer Certification

Hyderabad

04/2024 - Present

ID : 80c7fd8ac1e14c1b938c5c3212bef75e

AWS Certified Solutions Architect - Associate

Hyderabad

09/2023 - Present

Projects

ShareAPlate

08/2023 - Present

The "ShareAPlate" application's motive is to address and combat the critical issue of hunger and food insecurity. Its primary goal is to reduce and eventually eliminate hunger by connecting individuals or organizations who have excess food with those who are in need of it.

Technology Used: React js, javascript, vite js, bootstrap, firebase(backend and hosting), Chakra UI, React-redux
